SEA-FEVER

*I must go down to the seas again, to the lonely sea and the sky,
And all I ask is a tall ship and a star to steer her by;
And the wheel's kick and the wind's song and the white sail's shaking,
And a gray mist on the sea's face, and a gray dawn breaking.*

*I must go down to the seas again, for the call of the running tide
Is a wild call and a clear call that may not be denied;
And all I ask is a windy day with the white clouds flying,
And the flung spray and the blown spume, and the sea-gulls crying.*

*I must go down to the seas again, to the vagrant gipsy life,
To the gull's way and the whale's way, where the wind's like a
whetted knife;
And all I ask is a merry yarn from a laughing fellow-rover,
And quiet sleep and a sweet dream when the long trick's over.*

Officers

4 Staff

Congratulations to the graduating class of '73. You were the closest knit, finest group I have ever had the pleasure of knowing. Your individual achievements here at the University have reflected the highest credit on this Unit and the Naval Service.

As Commissioned Officers in the Navy and Marine Corps you have gained entrance into a unique "club," dedicated to duty--and always willing to accept full responsibility.

F. P. Koval

F. P. KOVAL
Captain, U.S. Navy
Commanding Officer and
Professor of Naval Science

Along with the Captain, I extend my heartiest congratulations to the graduating class as well as best wishes to those who remain. I was given some excellent philosophy by a good friend which I would like to pass to both groups.

BONES

The anatomy of any association includes four kinds of bones.

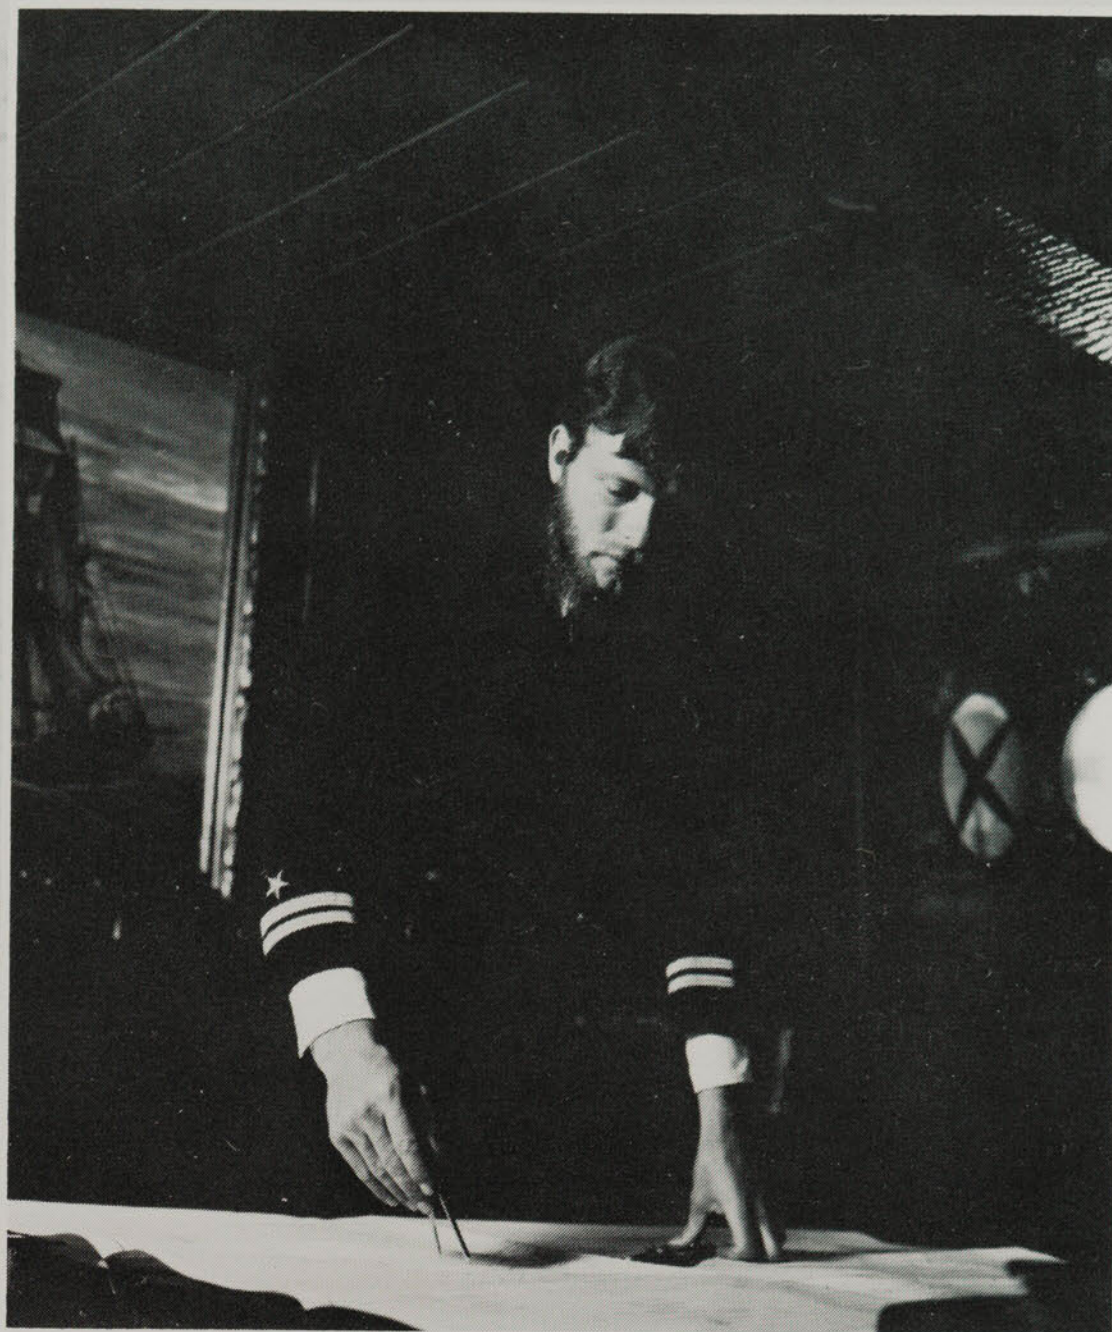

1. Wish Bones - Members who want someone else to do the work.
2. Jaw Bones - Members who talk a lot, but do little else.
3. Knuckle Bones - Members who knock everything others try to do.
4. Back Bones - Members who get behind the wheel and do the work.
